General setup

Configure your store settings and contact information.

Store settings

Update your store name, currency and timezone.

Store name

Private URL

Default currency

Time zone

Tax settings

Default sales tax

Barcode and SKU settings

Control how SKUs are generated and how barcodes will be formatted.

SKU GENERATION

Generate SKUs by number

SKUs will be generated by sequence number instead of product name.

Current sequence number

📘 We have moved label printing settings to the new "Devices and printing" page [here](#).

BARCODES

Embedded barcodes

[Learn how to embed prices and weights](#)

Customer settings

Automatically add customers from emailed receipts to the sale

Web register scanning behavior

Combine items with the same SKU

In the Web register, products with the same SKU will merge into one line item. The quantity will increase as products are added or scanned.

Contact information

Manage your contact information including name, phone number and address details.
