Security

Manage access and authentication settings for your store

Default settings

These settings will apply to all users.

Settings applied to specific roles will override default settings.

[Learn more](#) about keeping your Lightspeed Retail account secure.

LOG IN ACCESS

Ensure your account is secure by restricting access to roles you trust. Users who don't have access will be able to use Lightspeed Retail by switching users once someone has logged in.

☒ Has access to log in

☐ Only has access to log in through user switching

SWITCHING USER ACCOUNTS

Select a requirement for switching user accounts once someone has logged in.

☐ Never require a password when switching between users

☐ Don't require a password when switching with a barcode

☒ Require a password when switching to a user with more privileges

☐ Always require a password when switching between users

AUTHENTICATION METHOD

Manage your authentication method when users enter their password to access Lightspeed Retail.

☒ Username and password

☐ Username and password with multi-factor authentication

INACTIVITY RE-AUTHENTICATION

After a period of inactivity the session will be paused. You can require users to re-authenticate to resume working.

☐ Require logging in after inactivity

Role specific settings

Ensure your account is secure by restricting access to specific roles.

Role	Log in access	Authentication method
Admin	Has access to log in	Default setting
Manager	Default setting	Default setting
Cashier	Default setting	Default setting
